

# Impacts of Artificial Intelligence on Education

## Problems

- Access to high-quality educational content
- Democratization of Education among minorities
- Addressing irregularities : algorithmic biases, security and data privacy concerns

## Solutions

- Creation of MOOCs (Massive online open courses)
- AI-augmented systems for people with disabilities

# Impacts of Artificial Intelligence on Education

## Positives

- A tremendous amount of potential application (question generation, question answering)
- Personalize learning experience

## Negatives

- Goals not clearly defined
- Fairness not well established and there are still irregularities to address (bias)
- Domino effect.

Thank you
